

MINIMUM ROYALTIES (TARIFFS) PUBLISHING OF SHEET MUSIC

1.1 Song collections

Royalty is set as a % of a book wholesale price multiplied by the number of copies.

If a book is not for sales, the royalty for one author's work(s) or its/their translation(s) published in books is set as a % of the unit cost of a copy multiplied by the total number of its printed copies.

| Type of work | Authors | Royalty |
|-------------------------|-------------------|----------------|
| Lyrics with sheet music | authors of lyrics | 6% |
| | composer | 6% |
| Sheet music | composer | 12% |

A translator receives royalty interest from the royalty share going to the author of the text in line with AKKA/LAA distribution rules or in line with the authors' own agreement about special distribution of their shares as provided by their application submitted to AKKA/LAA.

A music arranger receives royalty interest from the royalty share going to the composer in line with AKKA/LAA distribution rules or in line with the authors' own agreement about special distribution of their shares as provided by their application submitted to AKKA/LAA.

1.2 Anthologies, press publications, booklets, calendars, etc.

Anthologies etc. publications in which other types of works are also published (literary, dramatic, etc.) – the basic tariff for publications is for print run up to 1000 copies.

| Type of work | Authors | Royalty in EUR | |
|-------------------------|-------------------|-----------------------|-----------------------------------|
| Lyrics with sheet music | authors of lyrics | 0.43 | per line |
| | translator | 0.36 | per line |
| | composer | 0.43 | per sheet music line (line group) |
| | arranger | 0.11 | per sheet music line (line group) |
| Sheet music | composer | 0.43 | per sheet music line (line group) |
| | arranger | 0.11 | per sheet music line (line group) |

Notes:

These tariffs are for print run up to 1000 copies. If the publication is made in more copies, the tariff is multiplied by a corresponding coefficient and the multiplication is added to the base tariff. The coefficient is calculated by dividing the run with 10 000.

If 2000 copies are published, the coefficient is 0.2, if 3000 – 0.3 etc.

Discounts:

30% discount is applied to the works published in textbooks that correspond to the educational standards.
